Applicant				
AstraZeneca AB et al				
This report is the international pr Authority under Article 35 and t	eliminary examination report, established ransmitted to the applicant according to A	by this International Preliminary Examining rticle 36.		
2. This REPORT consists of a total	of 7 sheets, including this	cover sheet.		
3. This report is also accompanied	by ANNEXES, comprising:			
a. (sent to the applican	at and to the International Bureau) a total	of sheets, as follows:		
sheets of the	description, claims and/or drawings which	h have been amended and are the basis of this report		
	s containing rectifications authorized by the containing rectifications authorized by the containing terms are the containing the containing terms are the contained as the containing terms are t	his Authority (see Rule 70.16 and Section 607 of the		
sheets which	n supersede earlier sheets, but which this	Authority considers contain an amendment that goes		
beyond the Supplement		as filed, as indicated in item 4 of Box No. I and the		
b. (sent to the Internat	tional Bureau only) a total of (indicate typ	e and number of electronic carrier(s))		
6. (Sent to the Thier had		listing and/or tables related thereto, in computer		
readable form only, as indicated in the Supplemental Box Relating to Sequence Listing (see Section 802 of the Administrative Instructions).				
4. This report contains indications relating to the following items:				
-	of the report			
Box No. II Priori	ity			
Box No. III Non-	establishment of opinion with regard to no	ovelty, inventive step and industrial applicability		
Box No. IV Lack	of unity of invention			
Box No. V Reas	egard to novelty, inventive step or industrial			
	applicability; citations and explanations supporting such statement Box No. VI Certain documents cited			
Box No. VII Certz	in defects in the international application			
	ain observations on the international applic	cation

International application No.

Box	No. I	Basis of the report
1.	With r	egard to the language, this report is based on the international application in the language in which it was filed, unless ise indicated under this item.
		This report is based on a translation from the original language into the following language which is the language of a translation furnished for the purposes of:
		international search (under Rules 12.3 and 23.1(b))
		publication of the international application (under Rule 12.4)
		international preliminary examination (under Rules 55.2 and/or 55.3)
2.	furnisi	regard to the elements of the international application, this report is based on (replacement sheets which have been ned to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" to not annexed to this report):
	\boxtimes	the international application as originally filed/furnished
		the description:
		pages as originally filed/furnished
		pages* received by this Authority on
		pages* received by this Authority on
	Ш	the claims:
		pages as originally filed/furnished
		pages* as amended (together with any statement) under Article 19 pages* received by this Authority on
		pages* received by this Authority on
	П	the drawings:
	lan-mil	pages as originally filed/furnished
		pages* received by this Authority on
		pages* received by this Authority on
		a sequence listing and/or any related table(s) - see Supplemental Box Relating to Sequence Listing.
3.		The amendments have resulted in the cancellation of:
		the description, pages
		the claims, Nos.
		the drawings, sheets/figs
		the sequence listing (specify):
		any table(s) related to the sequence listing (specify):
4.		This report has been established as if (some of) the amendments annexed to this report and listed below had not been made, since they have been considered to go beyond the disclosure as filed, as indicated in the Supplemental Box (Rule 70.2(c)).
		the description, pages
		the claims, Nos.
		the drawings, sheets/figs
		the sequence listing (specify):
		any table(s) related to the sequence listing (specify):
٠		n 4 applies, some or all of those sheets may be marked "superseded."

International application No.

Box No. II Priority			
1. This report has been established as if no priority had been claimed due to the failure to furnish within the prescribed time limit the requested:			
copy of the earlier application whose priority has been claimed (Rule 66.7(a)).			
translation of the earlier application whose priority has been claimed (Rule 66.7(b)).			
This report has been established as if no priority had been claimed due to the fact that the priority claim has been found invalid (Rule 64.1). Thus for the purposes of this report, the international filing date indicated above is considered to be the relevant date.			
3. Additional observations, if necessary:			
The priority is considered valid.

Form PCT/IPEA/409 (Box No. II) (January 2004)			

International application No.

Box No. III Non-establishment of opinion with regard to novelty, inventive step and industrial applicability
The questions whether the claimed invention appears to be novel, to involve an inventive step (to be non obvious), or to be industrially applicable have not been examined in respect of:
the entire international application
claims Nos. 14-17
because:
the said international application, or the said claims Nos. 14-17
relate to the following subject matter which does not require an international preliminary examination (specify):
See PCT Rule 67.1.(iv).: Methods for treatment of the human or animal body by surgery or therapy, as well as diagnostic methods.
the description, claims or drawings (indicate particular elements below) or said claims Nos. are so unclear that no meaningful opinion could be formed (specify):
the claims, or said claims Nos are so inadequately supported by the description that no meaningful opinion could be formed.
no international search report has been established for said claims Nos.
the nucleotide and/or amino acid sequence listing does not comply with the standard provided for in Annex C of the Administrative Instructions in that:
the written form has not been furnished
does not comply with the standard
the computer readable form has not been furnished
does not comply with the standard
the tables related to the nucleotide and/or amino acid sequence listing, if in computer readable form only, do not comply with the technical requirements provided for in the Annex C-bis of the Administrative Instructions.
See Supplemental Box for further details.

PCT/Se 2003/000614

Box No. V	Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability;
	citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims Claims	1-13, 18-22	YES NO
Inventive step (IS)	Claims Claims	1-13, 18-22	YES NO
Industrial applicability (IA)	Claims Claims	1-13, 18-22	YES NO

2. Citations and explanations (Rule 70.7)

The following documents were cited in the search report:

- D1) WO 9903859 A1
- D2) WO 0042044 A1
- D3) WO 0045846 A1

The claimed invention relates to novel spiro[1-azabicyclo[2.2.2]octane-3,2'(3'H)-furo[2,3-b]pyridine] derivatives, which are potent ligands for nicotinic acetylcholine receptors (nAChR's) and can be used for the treatment of disorders related to this ligand.

D1, which is considered to be the most relevant document, relates to structurally very close compounds with the same therapeutical use. The claimed compounds only differ from the known compounds through the substitution on the furo[2,3b]pyridine group in the 5'position. In the claimed compounds substitution represents an eventually substituted "thiophenyl" or "benzothiophenyl", group while the substitution in known compounds represents listed from examples 15-18,21-22 and 38 of "morpholino", "azetidiny", "pyridyl", "furyl" or "piperazinyl" group.

The differences consist consequently of structurally close heterocyclic groups.

The problem to be solved by the present invention may therefore be regarded as novel spiro[1-azabicyclo[2.2.2]octane-3,2'(3'H)-furo[2,3-b]pyridine] derivatives which are potent ligands for nicotinic acetylcholine receptors (nAChR's) and can be used for the treatment of disorders related to this ligand.

PCT/Se 2003/000614

Supplemental Box

In case the space in any of the preceding boxes is not sufficient. Continuation of: Box V

This is achieved with the novel derivatives.

Regarding the cited document above, it would be obvious to a person skilled in the art to prepare the claimed compounds and that the novel compounds would achieve the same therapeutical effect as the known compounds in D1.

The paragraphs on pages 11-12 regarding the pharmacology tests describe tests that are the same tests as in D1. The applicant has not shown that the claimed compounds are likely to have any unexpected beneficial effect over the prior art.

Thus, the claimed invention in claims 1-13 lacks inventive step.

Claims 18-20, which relate to the compounds wherein one or more of the atoms is a radioisotope and to the use the compounds in screening, are considered to involve particular executions obvious to a person skilled in the art for which patent protection is not justified. Thus, claims 18-20 lack inventive step.

Claims 21 and 22 relate to spiro[1-azabicyclo[2.2.2]octane-3,2'(3'H)-furo[2,3-b]pyridine] derivatives as intermediate for the preparation of the claimed compounds.

D2 relates to structurally close spiro[1-azabicyclo[2.2.2]octane-3,2'(3'H)-furo[2,3-b]pyridine] derivatives as intermediate (structure VI) for the preparation of 5' or 6' substituted spiro[1-azabicyclo[2.2.2]octane-3,2'(3'H)-furo[2,3-b]pyridine] derivatives.

Thus, claims 21-22 lack inventive step.

D3 relates to pharmaceutical compositions containing nicotine or a ligand of nicotine receptors and a monamine oxydase inhibitor and their use.

D3 discloses the general state of art and is not considered to be of particular relevance.
